LIST OF CONTENTS

Number 1

Mukesh Jain and H. K. Sehgal	1	Composition dependence of optical and electrical characteristics in flash evaporated $Pb_{1-x}Hg_xTe$ films
J. B. Hasted, S. K. Husain, F. A. M. Frescura and J. R. Birch	11	The temperature variation of the near millimetre wavelength optical constants of water
A. Hadni	17	Type II pyroelectric detectors
M. M. Pradhan, R. K. Garg and M. Arora	25	Multiphonon infrared absorption in silicon
A. A. Andronov, Yu. N. Nozdrin and V. N. Shastin	31	Tunable FIR lasers in semiconductors using hot holes
H. Ohta and K. Nagasaka	39	Far infrared polarization measurements of $MEM(TCNQ)_2$ at room temperature and 4.2 K
A. Shahar and A. Zussman	45	PbSnTe–PbTeSe lattice matched single heterostructure diode lasers grown by LPE on a (110) oriented PbSnTe substrates
Naoki Oda	49	Studies on optimization for HgCdTe heterojunction photodiodes
J. A. A. Engelbrecht, I. G. Lee and D. J. L. Venter	57	Optical characterization of doped and undoped GaAs at 300 K

Number 2

Announcement	i	
J. Hinderling, M. W. Sigrist and F. K. Kneubühl	63	Laser-photoacoustic spectroscopy of water-vapor continuum and line absorption in the 8 to 14 μm atmospheric window
Wei-Jun Yang, Guan-Rong Tan, Wen-Xia Yang, Xia Zhu, Ru-Lian Fu and Gui-Yun Kai	121	Theoretical analysis of the Doppler-free laser optoacoustic signal
A. Campbell, C. T. Elliott and A. M. White	125	Optimisation of SPRITE detectors in anamorphic imaging systems
Patents Section	I	
Software Survey Section	III	

Number 3

S. T. Kornilov, I. V. Ostrejkovsky, N. M. Prokopova, E. D. Protsenko and B. A. Chayanov	135	Energy transfer mechanisms in optothermal detectors
Y. Nemirovsky and I. Bloom	143	Tunneling currents in reverse biased $Hg_{1-x}Cd_xTe$ photodiodes
A. D. Hart, A. P. Pritchard and S. P. Lake	153	Infrared scene displays and their use in detector and processor assessment
J. R. Birch and E. A. Nicol	159	The removal of detector port radiation effects in power transmission or reflection Fourier transform spectroscopy
O. M. Williams	167	Infrared photodetector photon formalism: extension and application

A. D. DeBellis and M. J. D. Low	181	Dispersive infrared photothermal beam deflection spectroscopy
M. Tabib-Azar and P. Das	193	Characterization of diode arrays using nondestructive SAW technique
Gail Brown and John A. Detrio	199	Photoconductivity of Ga implanted Si
J. A. A. Engelbrecht	203	Evaluation of the peak ratio method for determining high carbon impurity concentrations in solar grade silicon
Patents Section	I	
Software Survey Section	V	

Number 4

M. M. Pradhan, R. K. Garg and M. Arora	207	Interaction of oxygen and carbon impurities with the multiphonon infrared absorption bands of silicon at low temperatures
Lucio Piccirillo, Arturo Moleti and Silvia Masi	215	Considerations on balloon-borne far infrared telescopes
K. Viswanathan, V. U. Nayar, G. Aruldhas and A. Bigotto	227	Vibrational spectra of $M_3PCr_4O_{16}$ ($M = K, NH_4$)
Th. Raiber and O. Weis	233	Low-mode submillimeterwave resonators for piezoelectric surface excitation of sound
S. Marchetti, R. Simili, M. Bernardini and M. Giorgi	241	Transverse photon drag detection of FIR radiation by free carriers in antimony thin films
G. C. Bhar, S. Das and N. P. Ghosh	245	Efficient infrared detection by two-step upconversion
F. F. Sizov, S. V. Plyatsko and S. D. Darchuk	249	The laser-irradiated transformation of intrinsic and impurity defects in narrow-gap $Pb_{1-x}Sn_xTe$
G. Sekar, V. Ramakrishnan and G. Aruldhas	253	Vibrational spectra of $Te(OH)_6 \cdot X_2SO_4$ ($X = Tl, Na$)
R. F. Gallup, T. G. Fiske, L. K. Andersson and L. B. Coleman	257	Increasing the high frequency limit of a commercial far-infrared interferometer
Svante Höjer, Henrik Ahlberg, Stefan Lundqvist, Jan Davidsson and Leif Holmlid	261	IR diode laser absorption spectroscopy in an NO seeded molecular beam
P. R. White, P. M. Clarkson and I. C. Carmichael	267	The application of adaptive noise cancellation to pyroelectric detectors
Patents Section	I	
Software Survey Section	III	

Number 5

A. Blanco, S. Fonti, A. Placente and V. De Cosmo	275	Wide band measurement of power transmission coefficients and polarizing efficiency of free standing wire grids in the far infrared
S. A. Brunker	281	Time-invariant spatial points in the far field of a CO_2 laser transmissometer
K. H. Michaelian	287	Signal averaging of photoacoustic FTIR data. I. Computation of spectra from double-sided low resolution interferograms
R. Gajić	297	Noise effects in Fourier-transform spectroscopy (two-sided interferograms)

Lennart Nordh, Göran Olofsson, Ove Appelblad and Lennart Klynning	305	The far infrared transmission of crystal quartz at 3 K
S. Sheik Saleem	309	Infrared and Raman spectroscopic studies of the polymorphic forms of nickel, cobalt and ferric molybdates
Y. Ichikawa, Y. Tsunawaki, M. Yamanaka, S. Okajima, L.-D. Wu, T. Iwasaki, M. Takai, A. Mitsuishi, T. Yamanaka and C. Yamanaka	317	Development of 385-μm D_2O laser for plasma diagnostics
S. W. McKnight, K. P. Stewart, H. D. Drew and K. Moorjani	327	Wavelength-independent anti-interference coating for the far-infrared
S. Narayana Kalkura, V. Ramakrishnan and S. Devanarayanan	335	IR and Raman studies of cholesterol monohydrate grown in gel medium
I. Ursu, I. Morjan, R. Alexandrescu, I. N. Mihailescu, A. M. Prokhorov, A. S. Lagutchev, A. N. Orlov and Yu. N. Petrov	339	The effect of infrared laser radiation on the selectivity of gas-mixture flow through metal capillaries
Letter to the Editor		
P. L. Meyer, M. W. Sigrist, F. K. Kneubühl and J. Hinderling	345	Comments on absolute absorption coefficients of atmospheric water vapor at CO_2 laser wavelengths
Erratum	I	
Patents Section	III	
Software Survey Section	VII	

Number 6

G. Buffa, G. Moruzzi and O. Tarrini	349	Pressure shift and broadening in CH_3OH: effects relevant to lasing transitions
A. Rogalski	353	Band-to-band recombination in $Ga_xIn_{1-x}Sb$
A. M. White	361	Negative resistance with Auger suppression in near-intrinsic, low-bandgap photo-diode structures
G. Sekar and G. Aruldhas	371	IR and polarized Raman spectra of $Te(OH)_6 \cdot 2KH_2PO_4 \cdot K_2HPO_4$
H. Ripper and H. Weisen	375	Large composite infrared high-vacuum windows made of NaCl
P. Rabache, B. Rebours and D. Leclerc	379	Effects of parameter variations in the radiative transfer equation: application to the lower stratosphere in the far infrared
M. Baleva, M. Maksimov and M. Sendova	389	Energy gap and optical dielectric constant of $Pb_{1-x}Cd_xSe$ films
J. Wirsich	399	Extinction coefficients of carbon grains in far-infrared
Z. Djurić	407	Quantum efficiency of photoconductive detectors—influence of reflection and surface recombination velocity
T. J. Parker	411	A null method for making absolute measurements of the reflectivity of transparent solids with high precision
Technical Note		
J. R. Birch and J. Lesurf	423	The near millimetre wavelength optical constants of Fluorosint
Patents Section	I	
Software Survey Section	VII
